Total Pages: 6

Total Handlers: 35

Report Description

This report identifies post-closure units subject to the post-closure requirements of 40 CFR 264/265 Subpart F, for which no institutional or engineering controls data has been entered. Specifically, the report will identify handlers with one or more process units whose most recent legal/operating status code is "PCCP" or "ISCP" without a linked CA770 or CA772 event that has an actual date. The report lists basic unit information along with the associated corrective action area name (if present).

Report Information
